Book Condition: New. Publisher/Verlag: Springer Netherlands | A Study in Mental Representation, Language Understanding and Linguistic Structure | Cognitive science is a field that began with the realization that researchers in varied disciplines-psychology, artificial intelligence, linguistics, philosophy, formal semantics, neuroscience, and others-had taken on a common set of problems in representation and meaning, in reasoning and language. Nevertheless, cognitive science as a whole enjoys no common methodology or theoretical framework, and is in danger of becoming even more fragmented with time. There are two reasons for this. First, cognitive science is built on existing methodologies that have different historical origins. AB a result, the psychologist's truth is different from the linguist's truth. The artificial intelligence researcher's truth is different from the philosopher's truth. The neuroscientist's truth is different from the formal semanticist's truth. All too often there is little or no recognition of the relevance of work in other disciplines to one's own concerns. Second, cognitive scientists tend to develop theories around isolated problems. For instance, there are theories about how humans categorize concepts, about how humans analyze linguistic expressions syntactically, about how the English tense system works semantically, about how humans reason about space or reason about time, about how goal-directed problem solving occurs, about how the brain computes, and so on. | One: Nuts and Bolts.- 1. Mental Representation.- Symbolism: The Classical Paradigm.- Cracks in the Symbolic Paradigm.- Connectionism: The Other Paradigm.- Methods of Models.- Assessing Theories of Mental Representation.- 2. Partitioned Representations.- General Overview.- The Contents of Spaces.- Parochial Reasoning.- Primary Contexts.- Partitioned Semantics.- Coherence.- Consolidation.- Secondary Contexts.- A Typology of Spaces.- Where Partitioned Representations Get Their Power.- Summary and Conclusions.- 3. Language: Process and Structure.- A Simple Philosophy of Language.- Linguistic Explanation.- The Process of Language Understanding.- Linguistic Evidence for Mental Representations.- 4. Three Levels of...
