Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 edition. Excerpt: .actual, everyday working conditions of our service the method is not so accurate as it is supposed to be. It was quite impossible at this time to deal with the personal equation of the operator or the chapter of accidents, but, in order to meet the first two of these reasons, a small bar of standard silver was prepared iu the Bureau laboratory with especial care to avoid segregation of the m etal. It was then rolled out and cut into small oblongs of which 30 to 35 were required to weigh 1,115 mg. To meet the third reason, four samples of the oblongs, each weighing approximately 3.75 g., sufficient for three determinations of the silver, were sent to each one of the same four laboratories at one time. Subsequently one laboratory ran two more samples. In all 66 assays were made and practically all...
