They finally learned what they were and that they might have disposed of them for four times the sum they had received. Redheads, which feed to a great extent on wild celery, often appear on the table masquerading as canvasbacks. In one case, at least, the gunner sold to some innocent clerks a lot of fish-eating sheldrakes or mergansers under the name of canvasbacks. I am told that the dishes that resulted were about as palatable as a bundle of old stewed kerosene lamp-wicks. No longer ago than 1850 canvasbacks hovered in interminable flocks about Chesapeake Bay. Over ten thousand people were accustomed to shoot there. These ducks were then plentiful in all first class restaurants and hotels of the East. The glories of Chesapeake Bay as a shooting ground have largely departed, and canvasback ducks are now rarely seen on tables where they formerly appeared often; but there is still a stock of breeding birds left, and with adequate protection it will be long before we see the last of the species. So far as I know, no one has as yet succeeded in breeding this bird in captivity. Therefore we cannot depend on artificial propagation; but must protect the stock of wild birds.
