By New York State Agricultural Society

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1868 Excerpt: .with lime, the opposite corner of the acre receives no benefit from the application; there is too much lime in one plat and none in the other. If the arable surfaces of the two soils are mixed together, both will be benefited and both will be more fertile. Or we may suppose that a soil deficient in phosphate of lime has a bone buried in it. After a certain time it will be found that some of the phosphate of lime and gelatine, with its included nitrogen, is dissolved, and the particles of earth in contact with the bone are saturated with the solution, and cannot take up any more. If we now remove the bone and bury it in unsaturated earth, another portion will be dissolved, and the soil contiguous to it-will be saturated. We may thus, by successive removals and burials of the bone...
